Opportunities for Public Participation in the Technology Review for the proposed AP35 smelter at Coega

Public Participation will form an integral component of the Technology Review Process for the proposed Coega Aluminium Smelter. Opportunities will be created for interested and affected parties to receive information on the project and submit comments and concerns that they may have. The comments and concerns raised by interested and affected parties will be considered for inclusion in the Final Technology Review which is submitted to the Department of Economic Affairs Environment and Tourism for their consideration.

The following provides an overview of the public participation process for the Technology Review:

- Letter 1 to I&APs: Update on the project and notification of the availability of the Draft Technology Review for public comment and input.
- Draft Technology Review placed in libraries and on project website
- Newspaper advert to update I&APs on the project and notification of the availability of the Draft Technology Review for public comment as well as notification of the public meeting
- Targeted Consultations
  - WESSA, Sundays River Valley Community Forum, Alliance Structures, SANParks (and other organizations as requested)
- Public Meeting – PE City Hall
- Two Focus Group Meetings – PE City Hall and Centenary Hall, New Brighton
- Written Comments from I&APs considered for inclusion in Comments and Response Trail
- Compile Comments Trail and Public Participation Report
- Letter 2 to I&APs: Notification of availability of Final Technology Review Report
- Letter 3 to I&APs: Notification of Record of Decision and 30 appeal period
